INSTALLATION GUIDE

IE AIR INTAKE SYSTEM FOR AUDI B9 Q5 2.0T
IEINCZ5

support@performancebyie.com

www.performancebyie.com

This installation guide is for instructional purposes only. For best results, professional installation by an experienced technician is always recommended. By reading this guide you agree Integrated Engineering is not responsible for any damage or personal injury caused by incorrect installation.

DIFFICULTY

Expect 20 - 40 minutes on average

REQUIRED PARTS

- No additional parts are required for this install

REQUIRED TOOLS

- Flathead screwdriver
- 3mm allen driver
- T25 torx driver
- 4mm allen driver

BEFORE YOU BEGIN

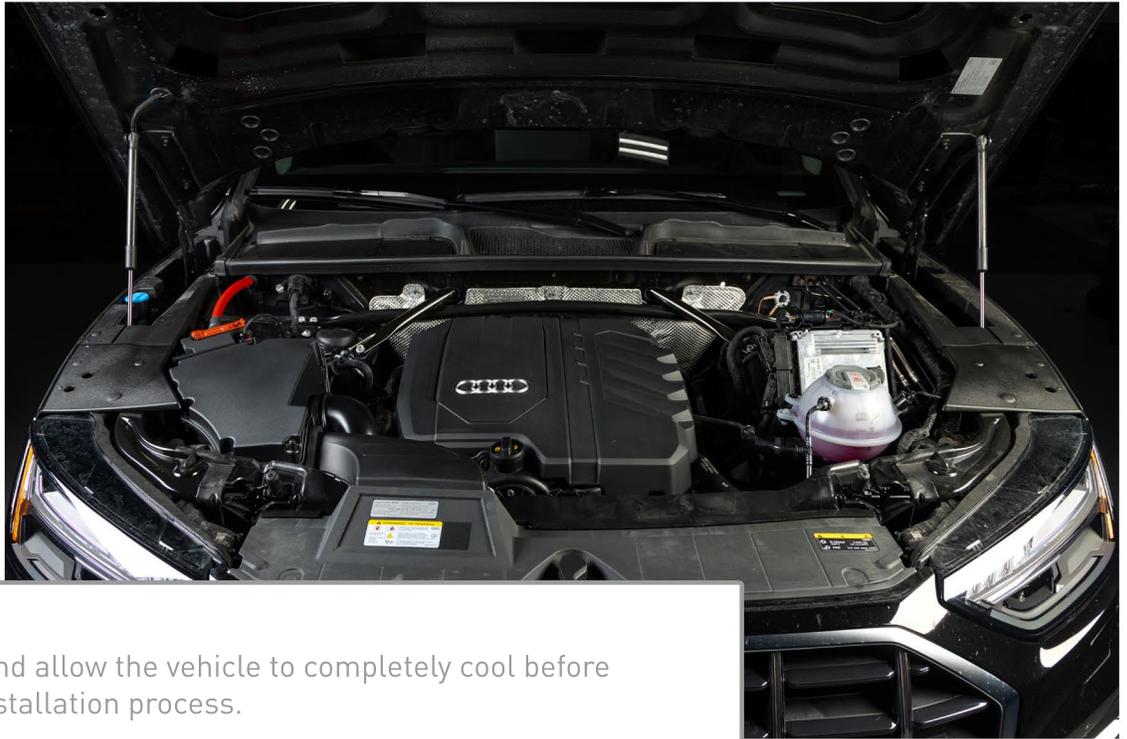

It is highly recommended to pre-read this entire guide ahead of your installation to familiarize yourself with each step. Always park your vehicle in a safe and level location and allow plenty of time for the engine bay and exhaust to completely cool. Locate and prepare your work space with each required tool listed above. Unbox all components and verify the contents and quantities before you begin. If anything is missing or damaged, please contact us for immediate help at support@performancebyie.com

SPECIAL NOTE:

This install guide has been photographed and written on a 2023 Audi Q5. Some steps and factory hardware specifications may vary depending on vehicle model, year, and region. This guide is for reference purposes only. If you are unsure of the installation procedure for any individual step or part, please seek professional help before proceeding.

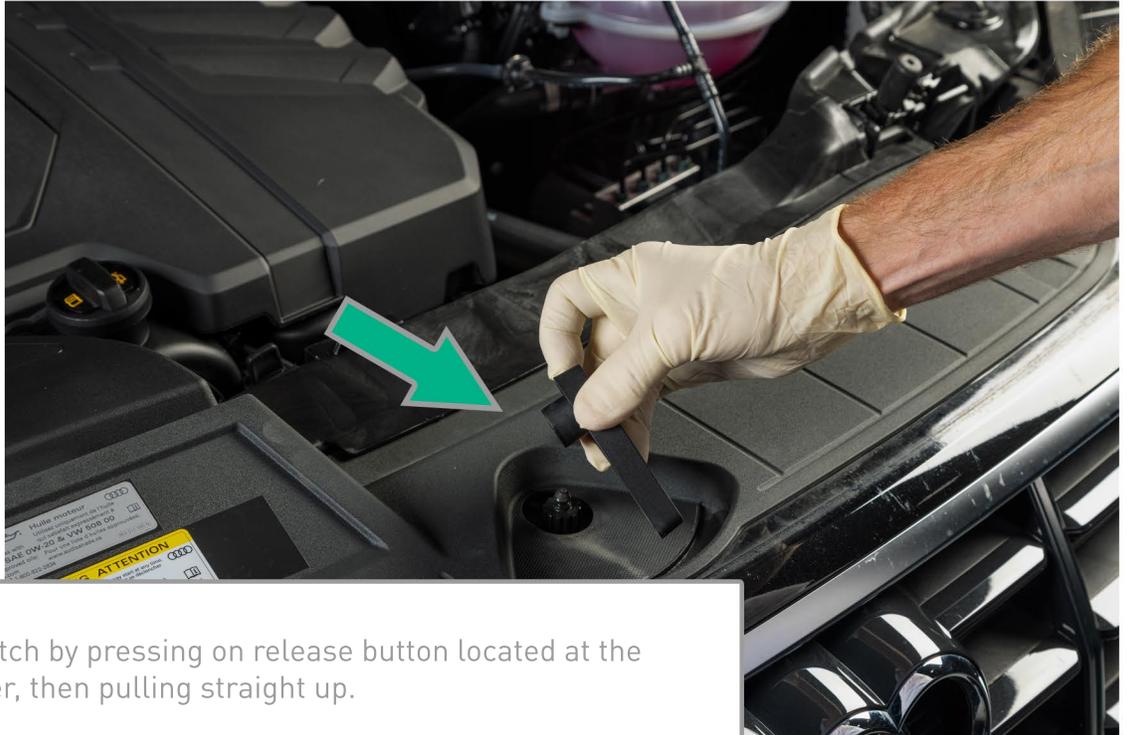

1

Pop your hood and allow the vehicle to completely cool before beginning the installation process.

2

Remove hood latch by pressing on release button located at the back of the lever, then pulling straight up.

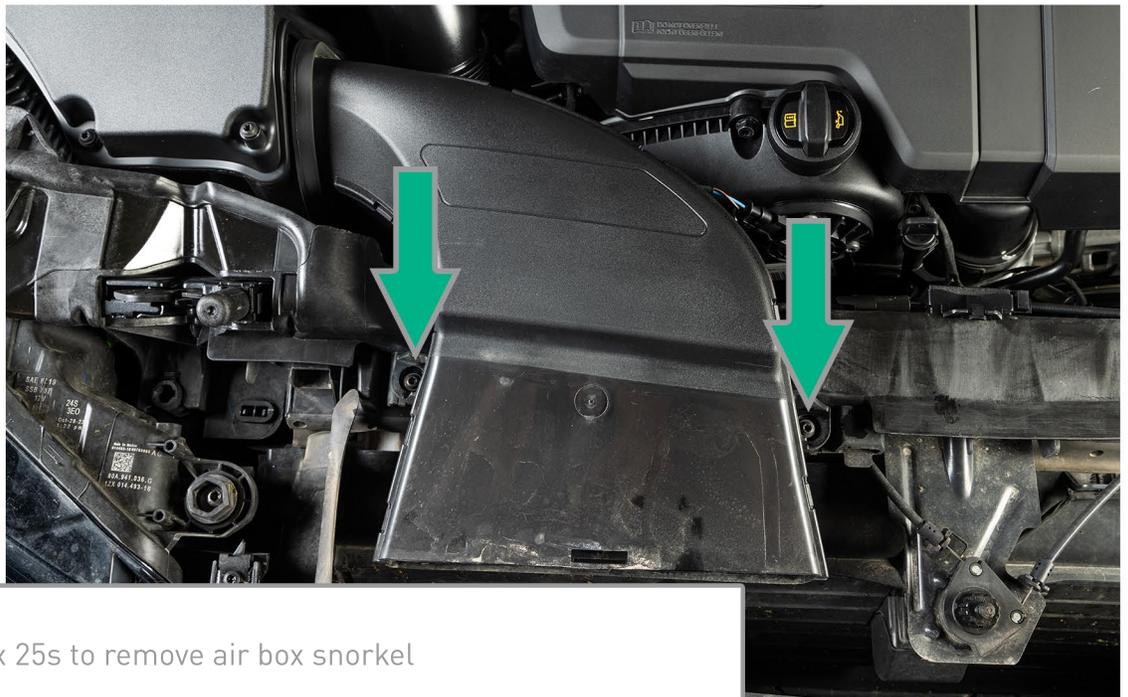

3

Lift up the corner of radiator support trim and follow along the front edge, to remove trim.

4

Remove two Torx 25s to remove air box snorkel

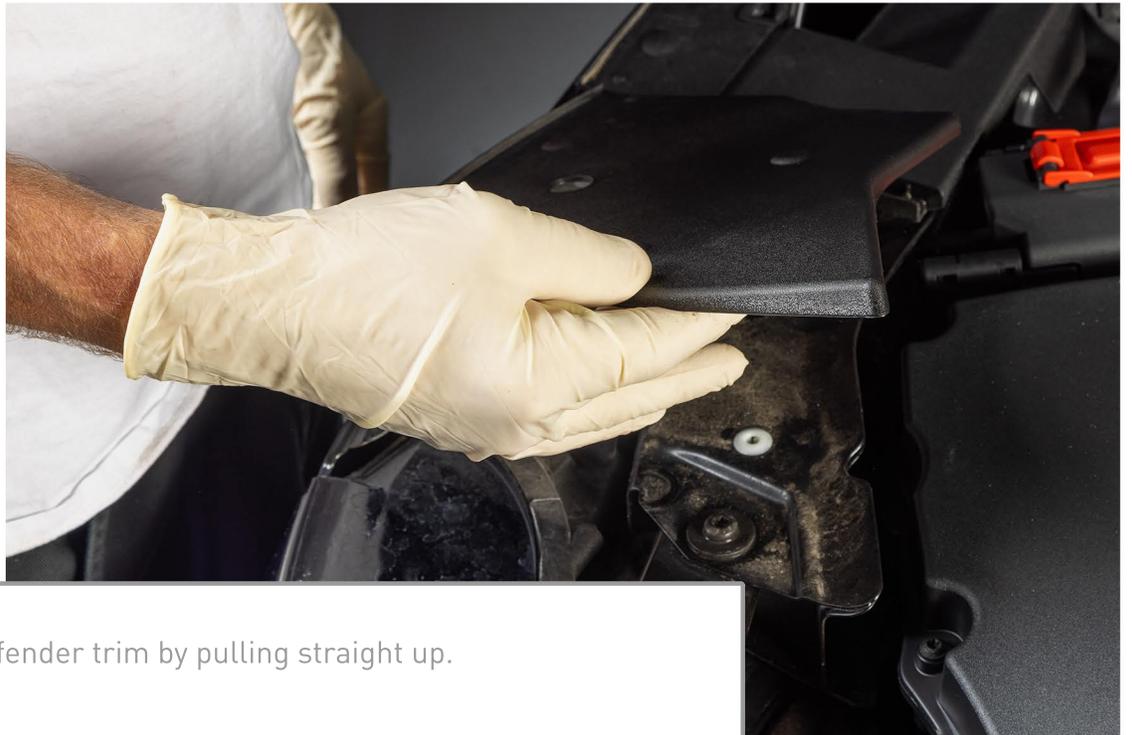

5

Remove Air Box Snorkle from engine bay.

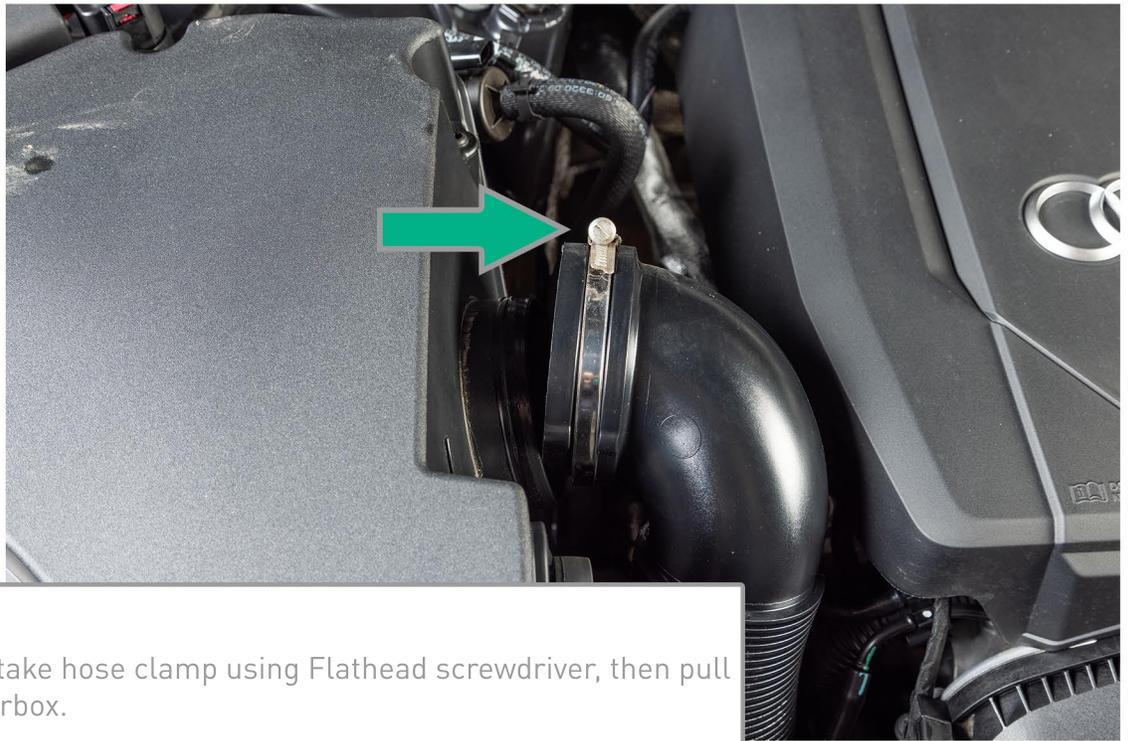

6

Lift and remove fender trim by pulling straight up.

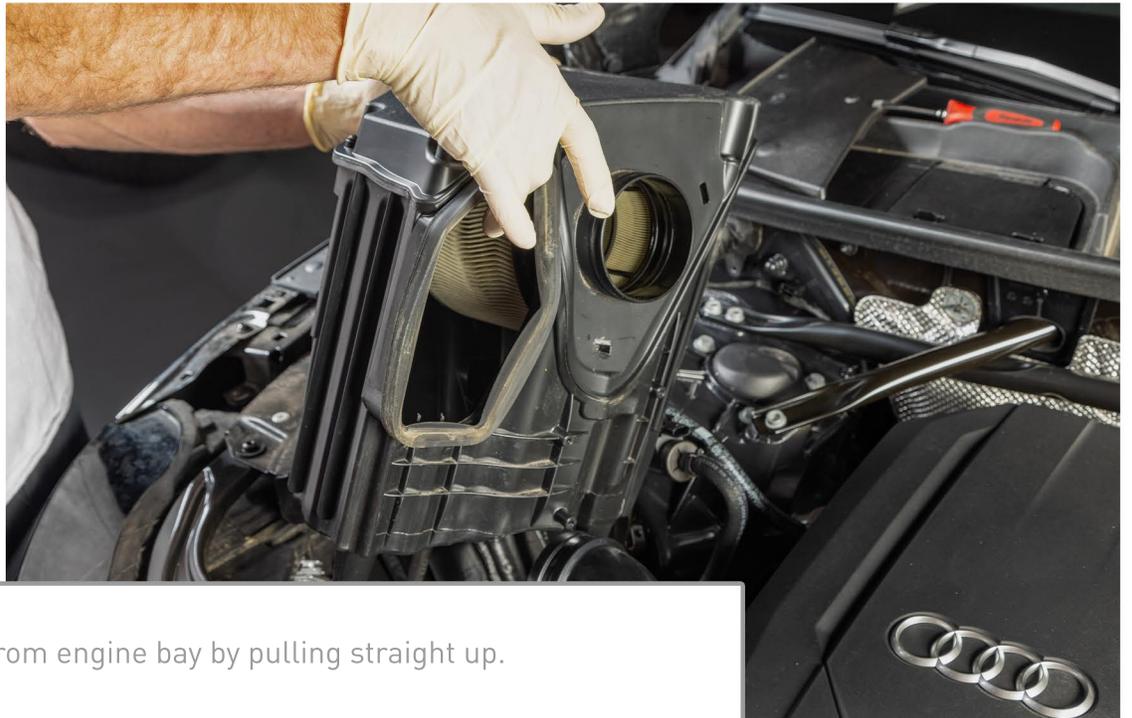

7

Loosen upper intake hose clamp using Flathead screwdriver, then pull away from the airbox.

8

Remove airbox from engine bay by pulling straight up.

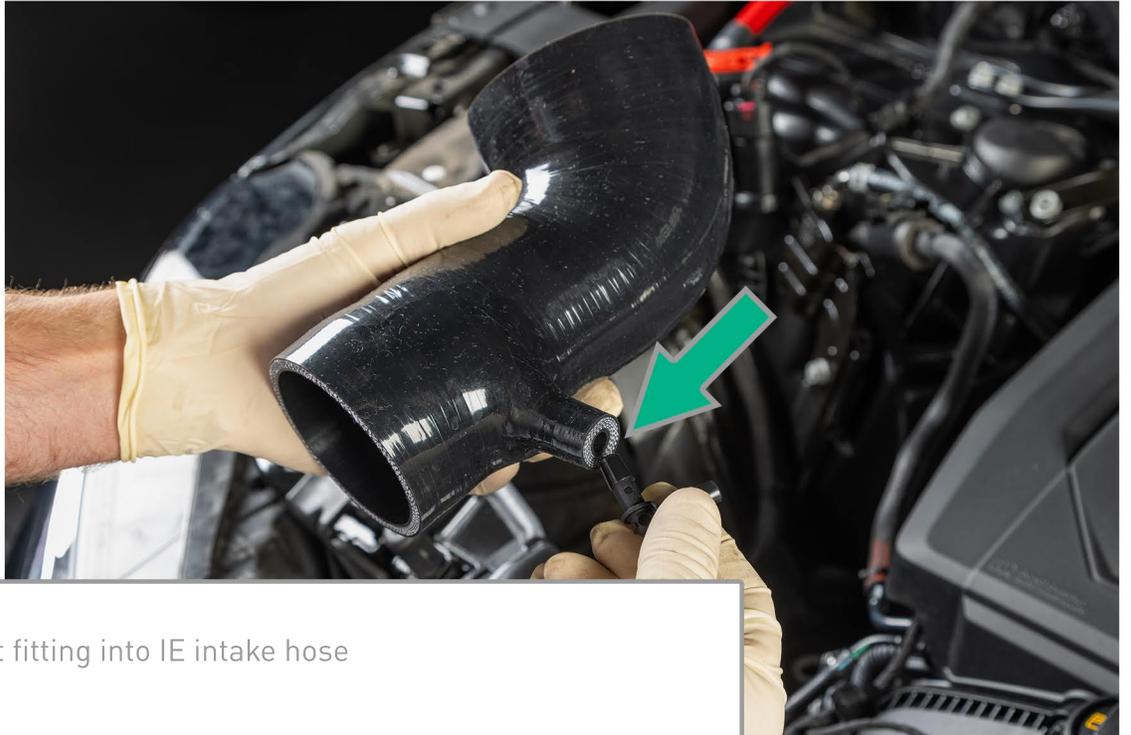

9

Loosen lower Intake Hose Clamp, then pull up on intake hose to remove from engine bay.

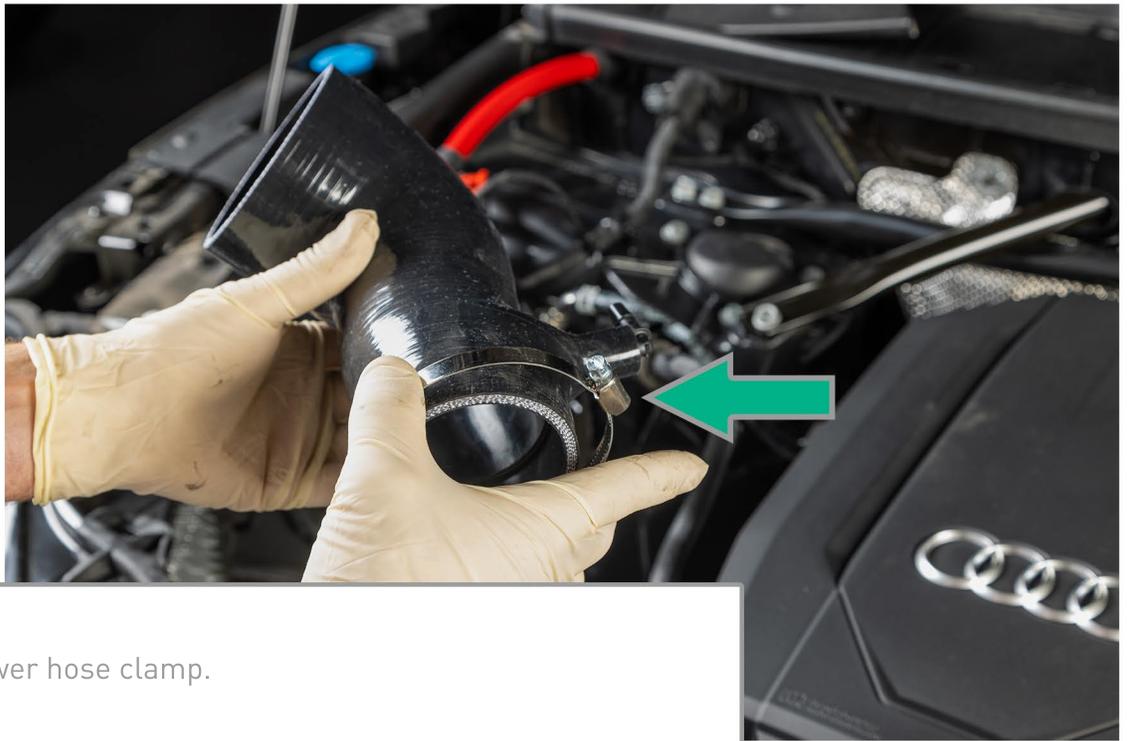

10

Insert turbo inlet fitting into IE intake hose

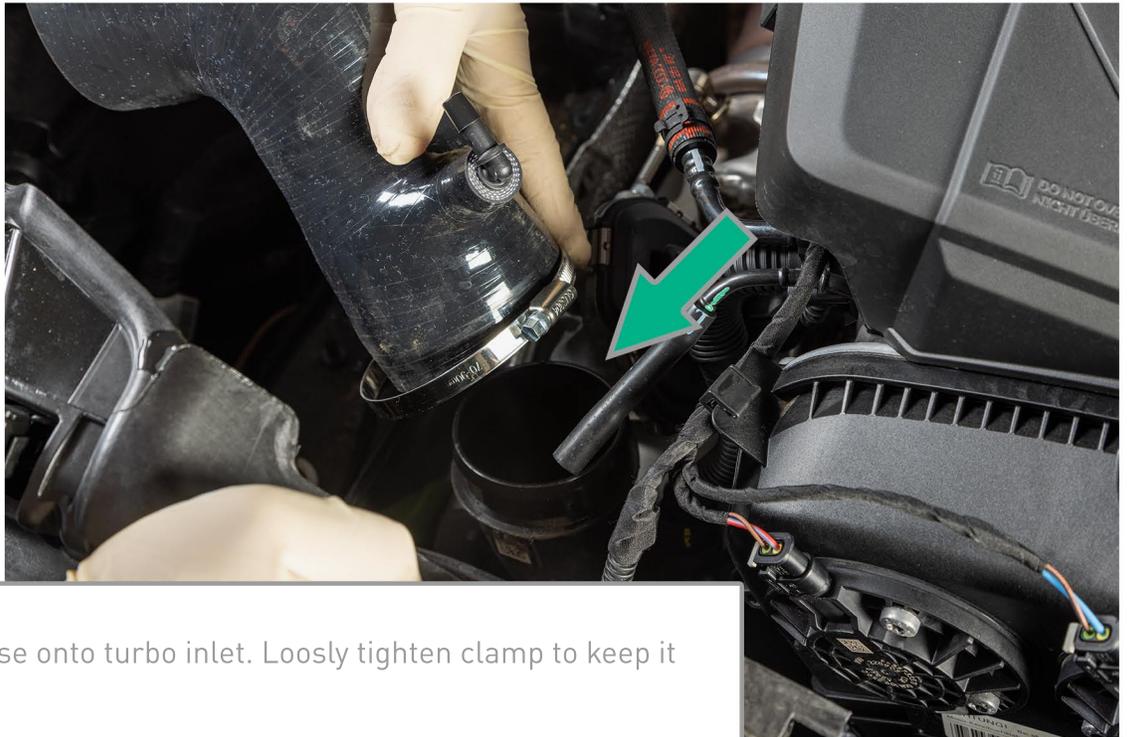

11

Loosly install lower hose clamp.

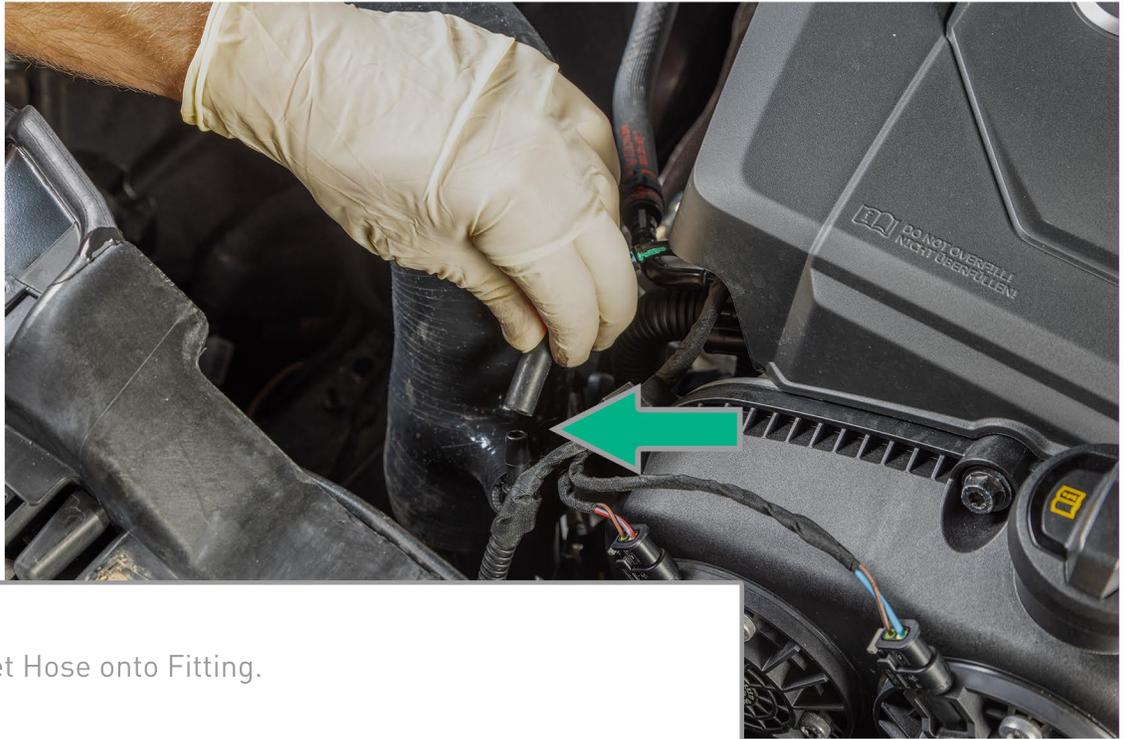

12

Lower Intake Hose onto turbo inlet. Loosly tighten clamp to keep it in place.

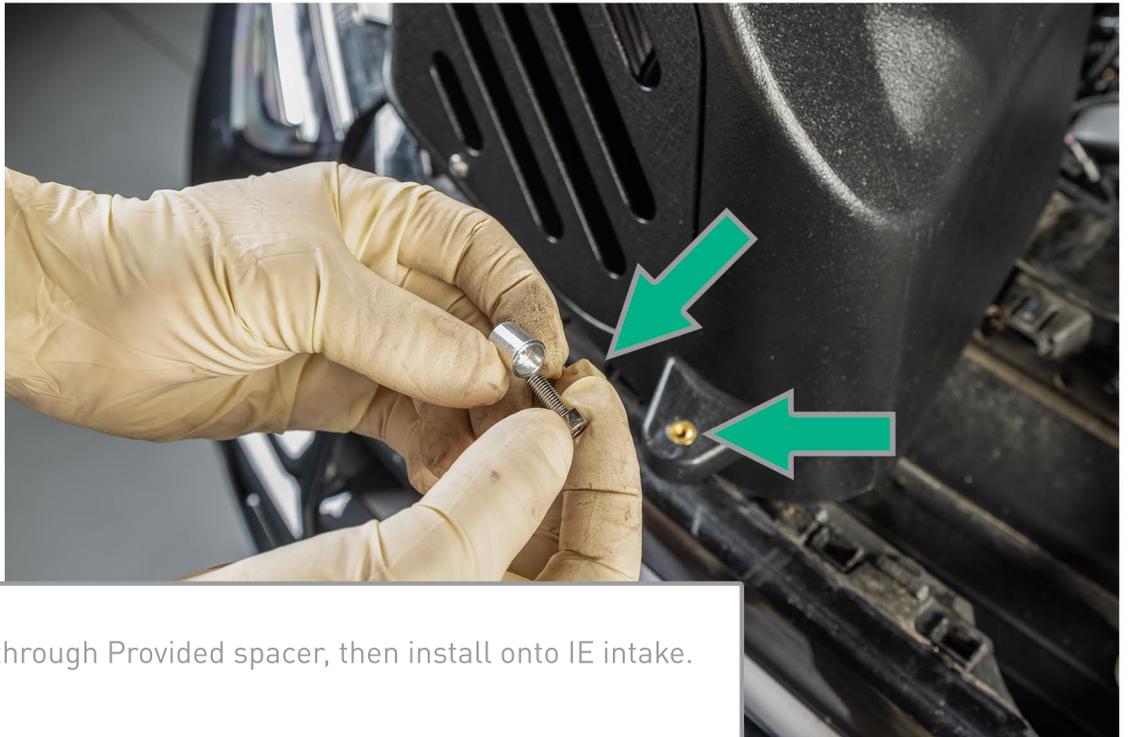

13

Install Turbo Inlet Hose onto Fitting.

14

Slide 4mm Bolt through Provided spacer, then install onto IE intake.

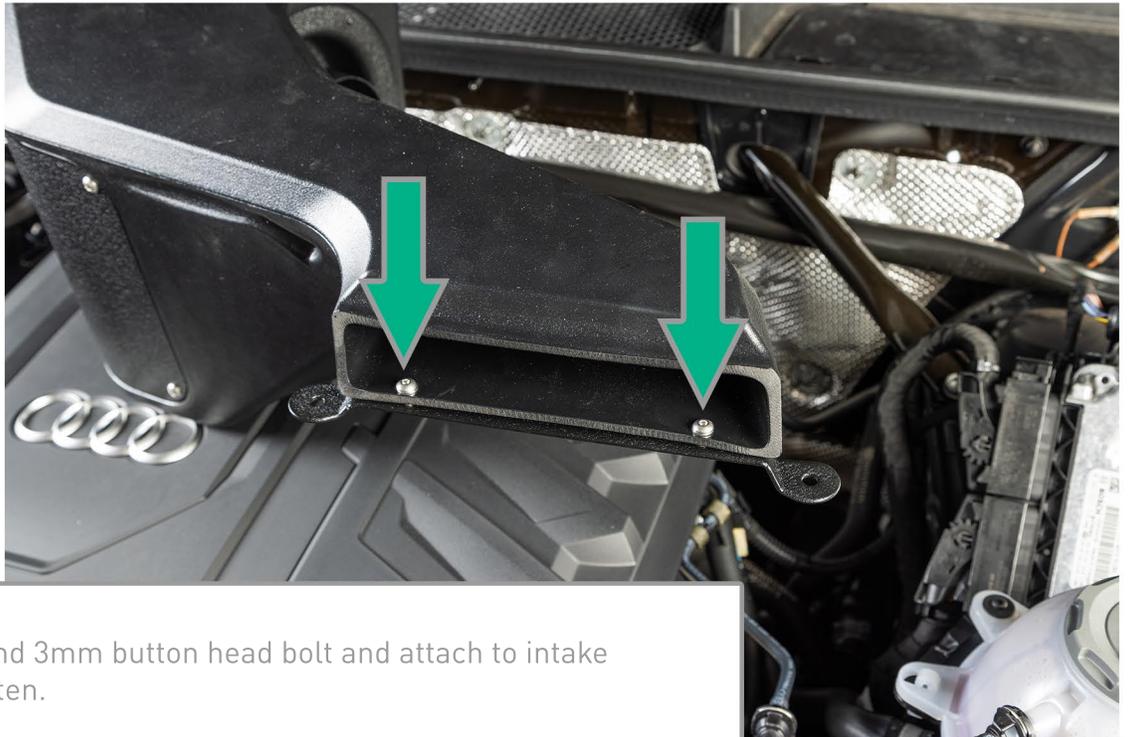

15

Orient Intake Bracket Plate to this angle before installing.

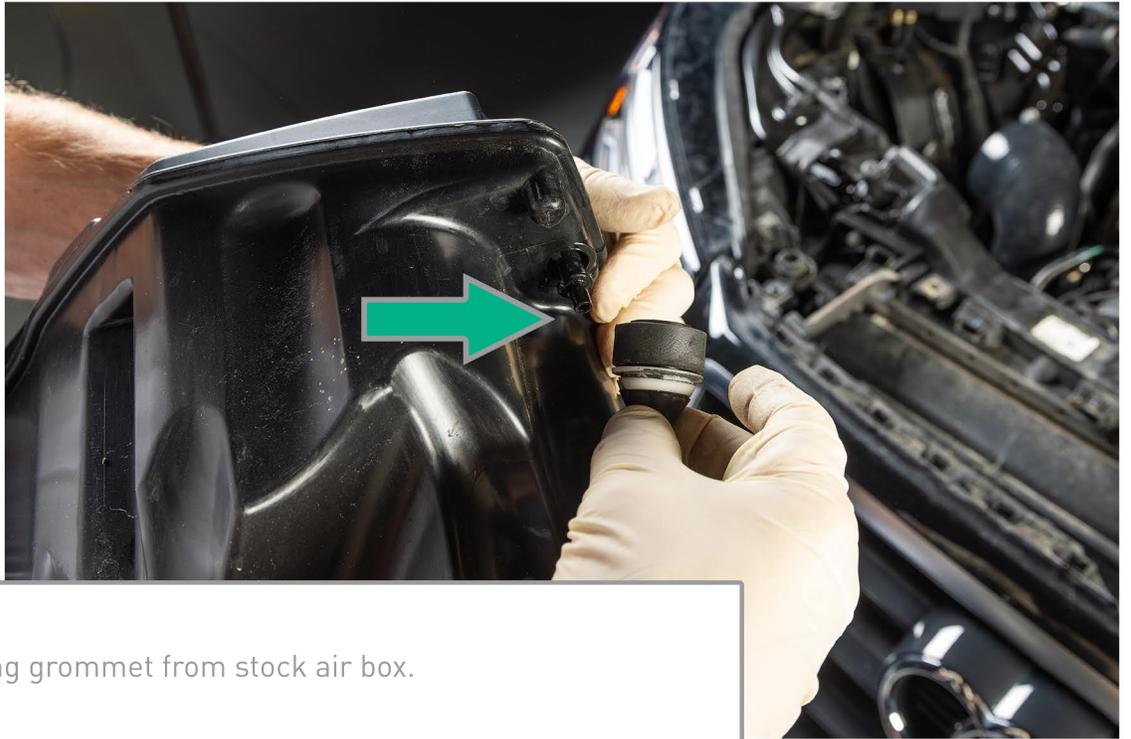

16

Install washer and 3mm button head bolt and attach to intake bracket and tighten.

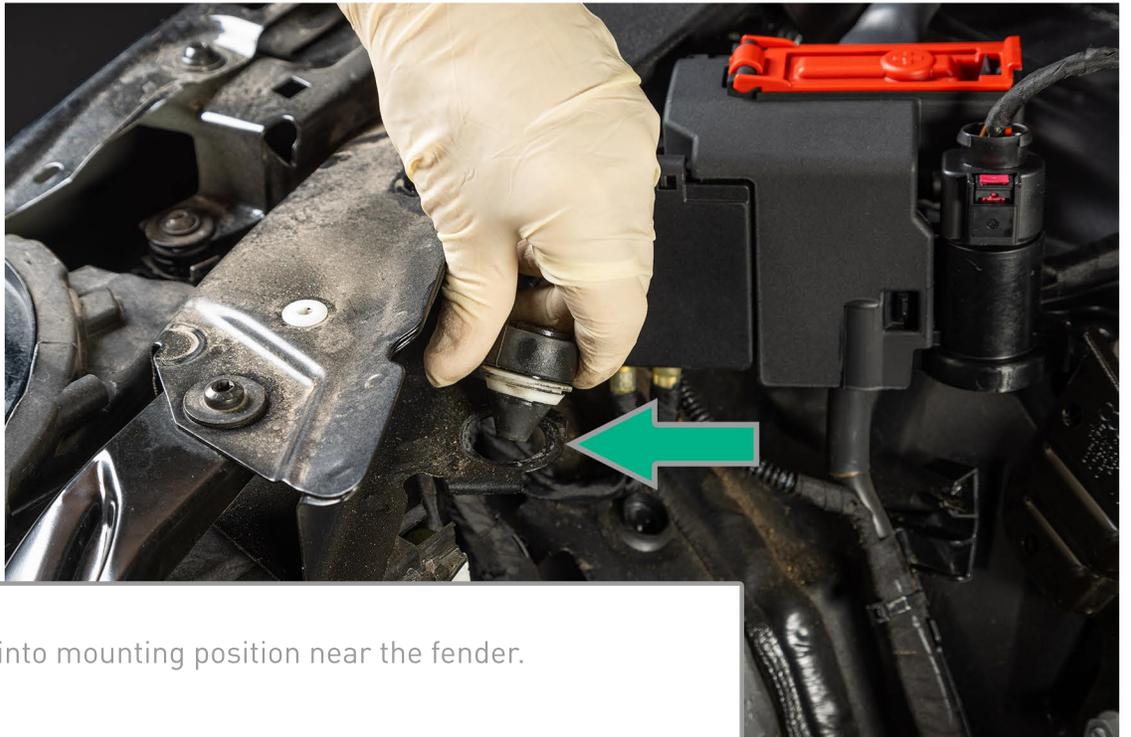

17

Remove mounting grommet from stock air box.

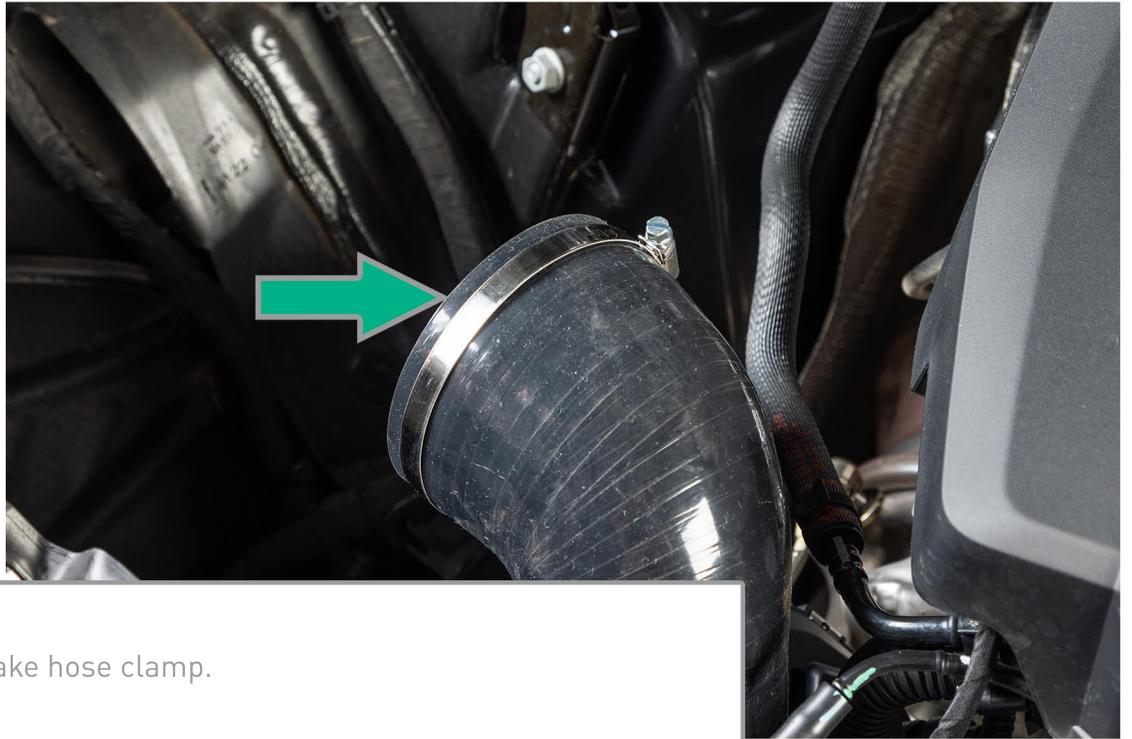

18

Insert grommet into mounting position near the fender.

19

Install upper intake hose clamp.

20

Lower the Intake into the engine bay and insert the filter into the inlet hose.

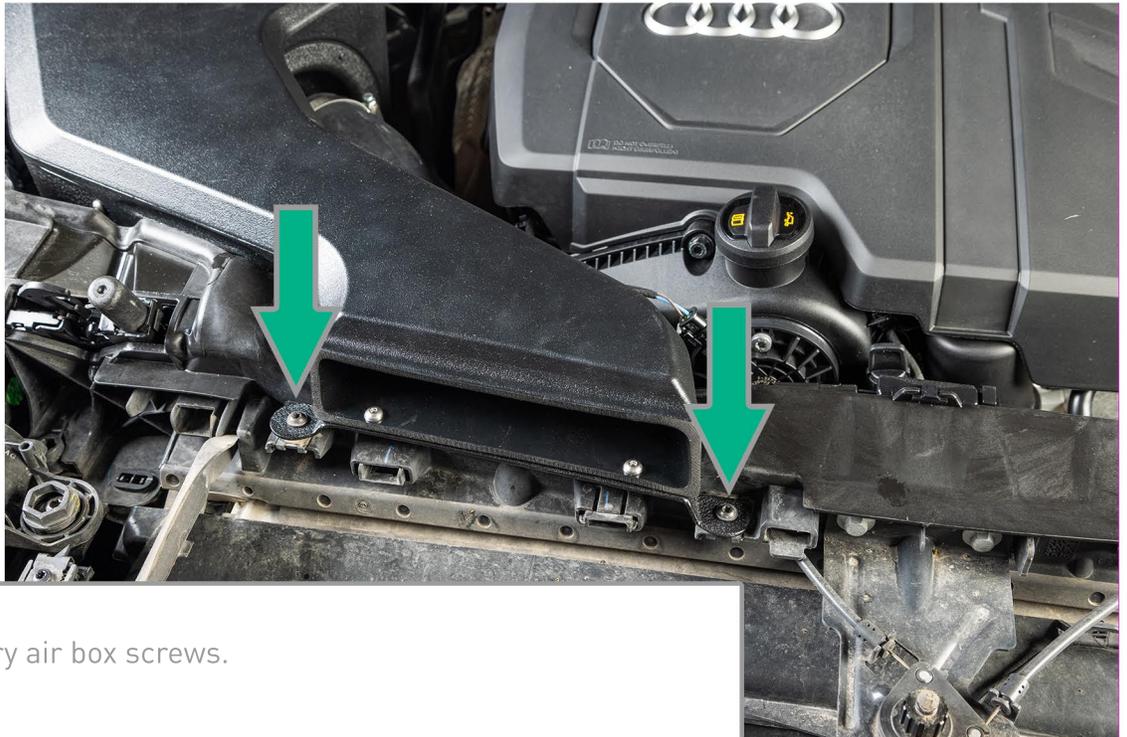

21

Once aligned, press the mounting pin into the rubber grommet.

22

Install two factory air box screws.

23

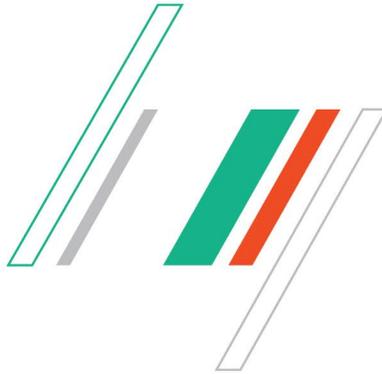

Tighten all hardware, and reinstall factory shrouds in reverse order.

Enjoy the power, sound and looks of your new IE Performance Intake!

ENJOY!
